

LIFE Egyptian Vulture Project

Final Conference

19-20-21 September 2023

SUPPLEMENTARY FEEDING STATIONS FOR THE
EGYPTIAN VULTURE IN THE CANARY ISLANDS

e-distribuzione

e-distribución

SUPPLEMENTARY FEEDING STATIONS FOR THE EGYPTIAN VULTURE IN THE CANARY ISLANDS

Lanzarote:

Honduras (2015)
Cabildo de Lanzarote

Peña Humar-El Jable (2022)

Las Breñas (2022)

Fuerteventura:

Tiscamanita (2007-2008)
Villaverde (2007-2008)
Cabildo de Fuerteventura

SUPPLEMENTARY FEEDING STATIONS FOR THE EGYPTIAN VULTURE IN THE CANARY ISLANDS

Lanzarote:

Honduras

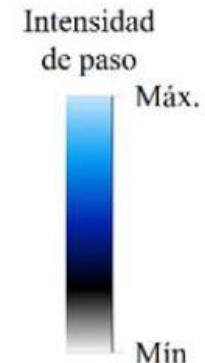

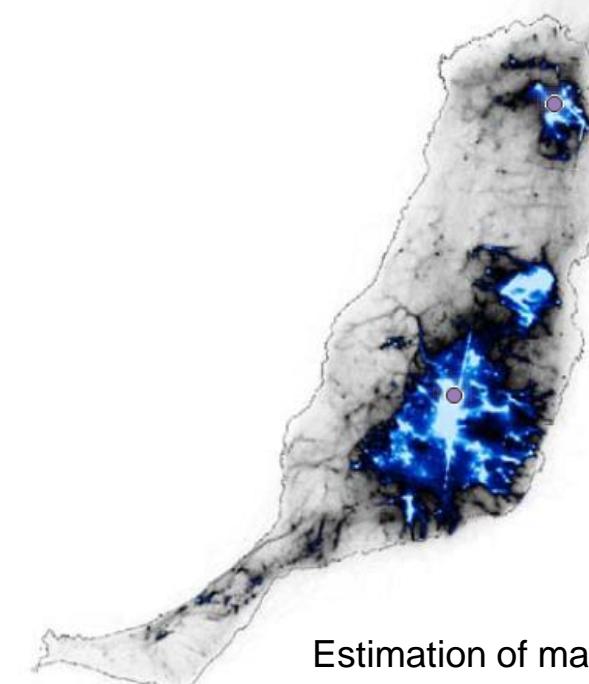

Peña Humar-El Jable (2021)

Las Breñas (2021)

Fuerteventura:

Tiscamanita

Villaverde

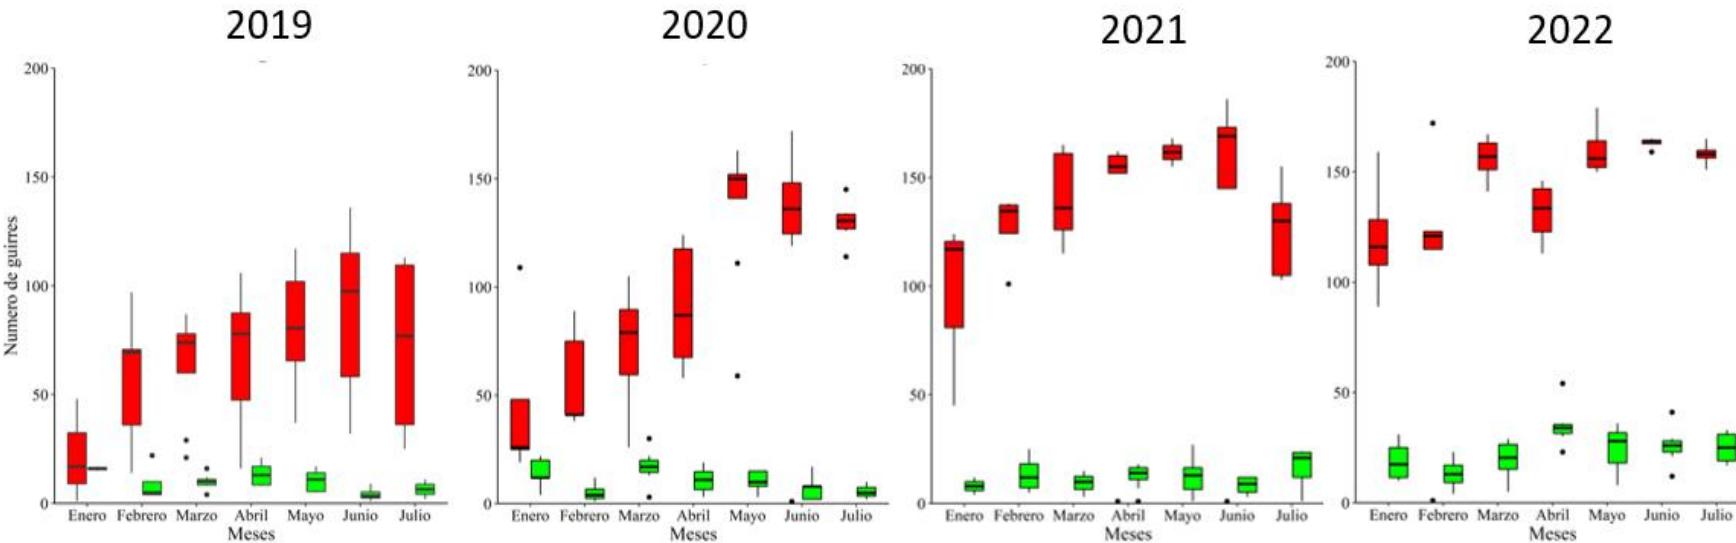

Estimation of main routes and their intensity of use by non-breeding guirres marked by GPS GPS-tagged breeding. Estación Biológica de Doñana 2022

Supplementary feeding station Tiscamanita

In 2022, **31** visits were made, with a range of **89-178** specimens. **4682** readings of PVC rings

Luzma Gutierrez

D.1. Seguimiento de la población de guirres (*Neophron percnopterus majorensis*) en las islas de Fuerteventura y Lanzarote.
Estación Biológica de Doñana (CSIC)

Comedero

- █ Tiscamanita
- █ Villaverde

Increasing use of the Tiscamanita and Villaverde supplementary feeding stations

Supplementary feeding station Tiscamanita

Maximum numbers of guirres:

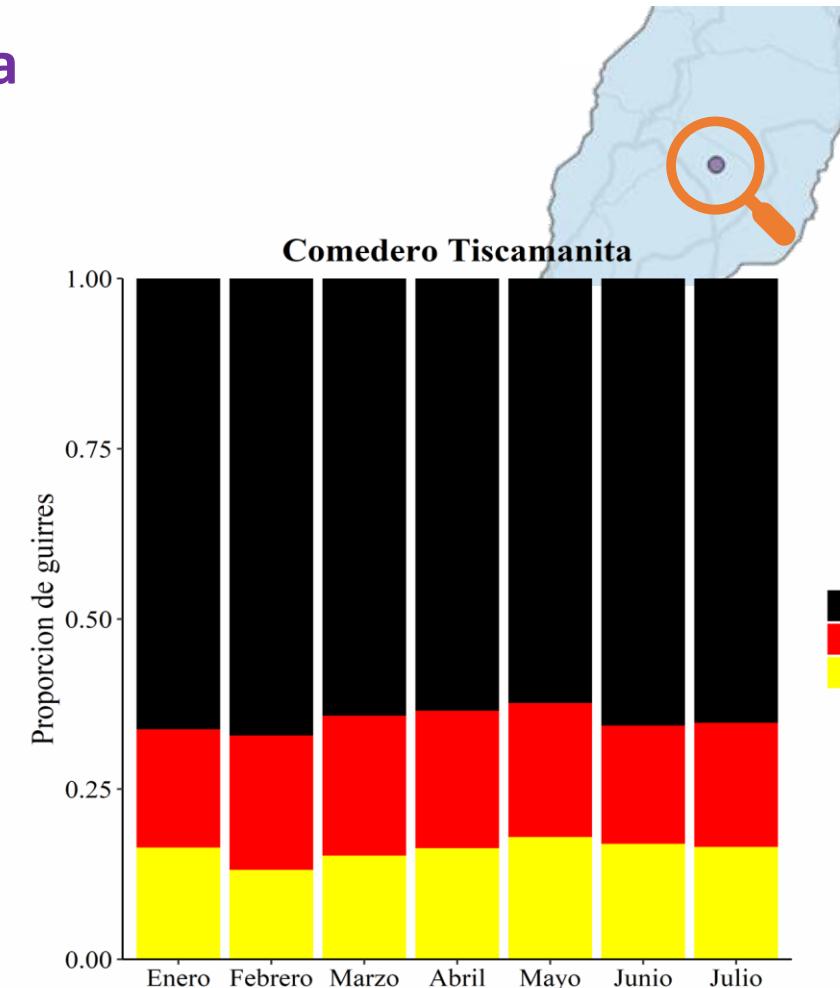

Temporal dynamics: Maximum number at the end of the season.

Dual functionality of the feeding station:

- Food
- Socialization

Constant fraction of juveniles in the feeding station:

- Predictability of food
- Socialization

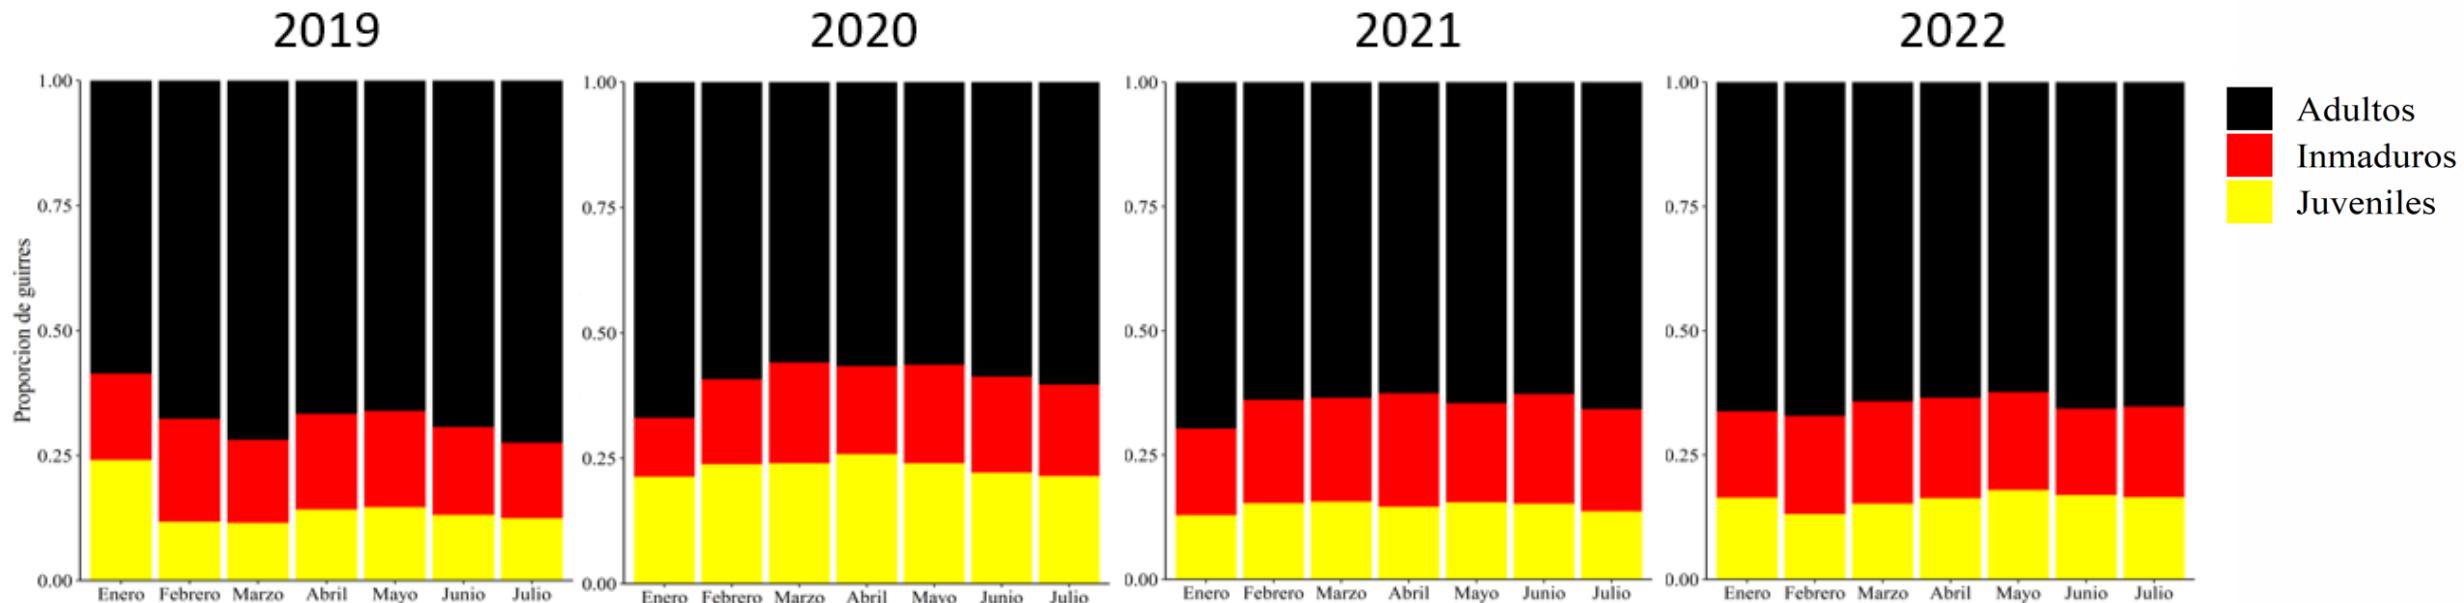

D.1. Seguimiento de la población de guirres (*Neophron percnopterus majorensis*) en las islas de Fuerteventura y Lanzarote.
Estación Biológica de Doñana (CSIC)

LIFE Egyptian Vulture Project Final Conference

19-20-21 September 2023
Unahotels Hotel MH
Matera (Italy)

Supplementary feeding station Tiscamanita

Monthly variations in the proportions of the three age classes under consideration

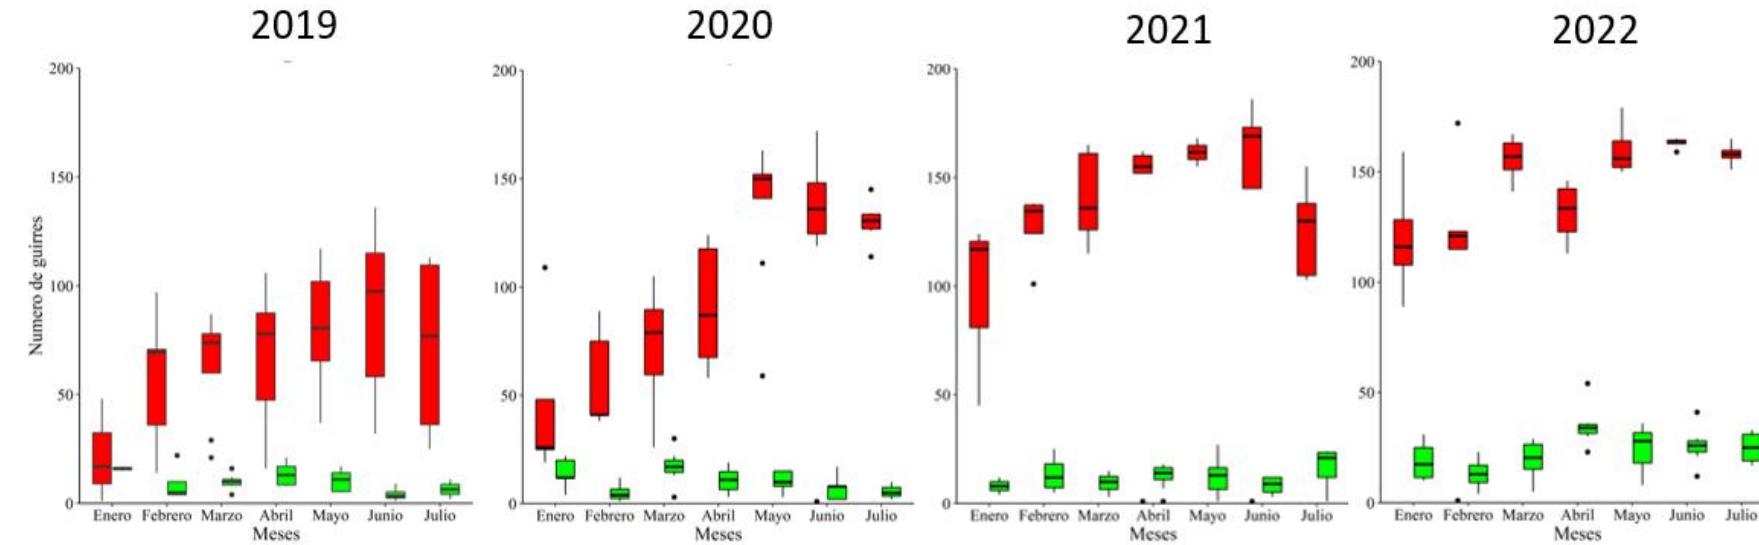

D.1. Seguimiento de la población de guirres (*Neophron percnopterus majorensis*) en las islas de Fuerteventura y Lanzarote.
Estación Biológica de Doñana (CSIC)

LIFE Egyptian Vulture Project Final Conference

19-20-21 September 2023
Unahotels Hotel MH
Matera (Italy)

Supplementary feeding station Villaverde

In 2022, **43** visits were made, with a range of **4-54** specimens. **1039** readings of PVC rings

D.1. Seguimiento de la población de guirres (*Neophron percnopterus majorensis*) en las islas de Fuerteventura y Lanzarote.
Estación Biológica de Doñana (CSIC)

Increasing use of the Tiscamanita and Villaverde supplementary feeding stations

Supplementary feeding station Villaverde

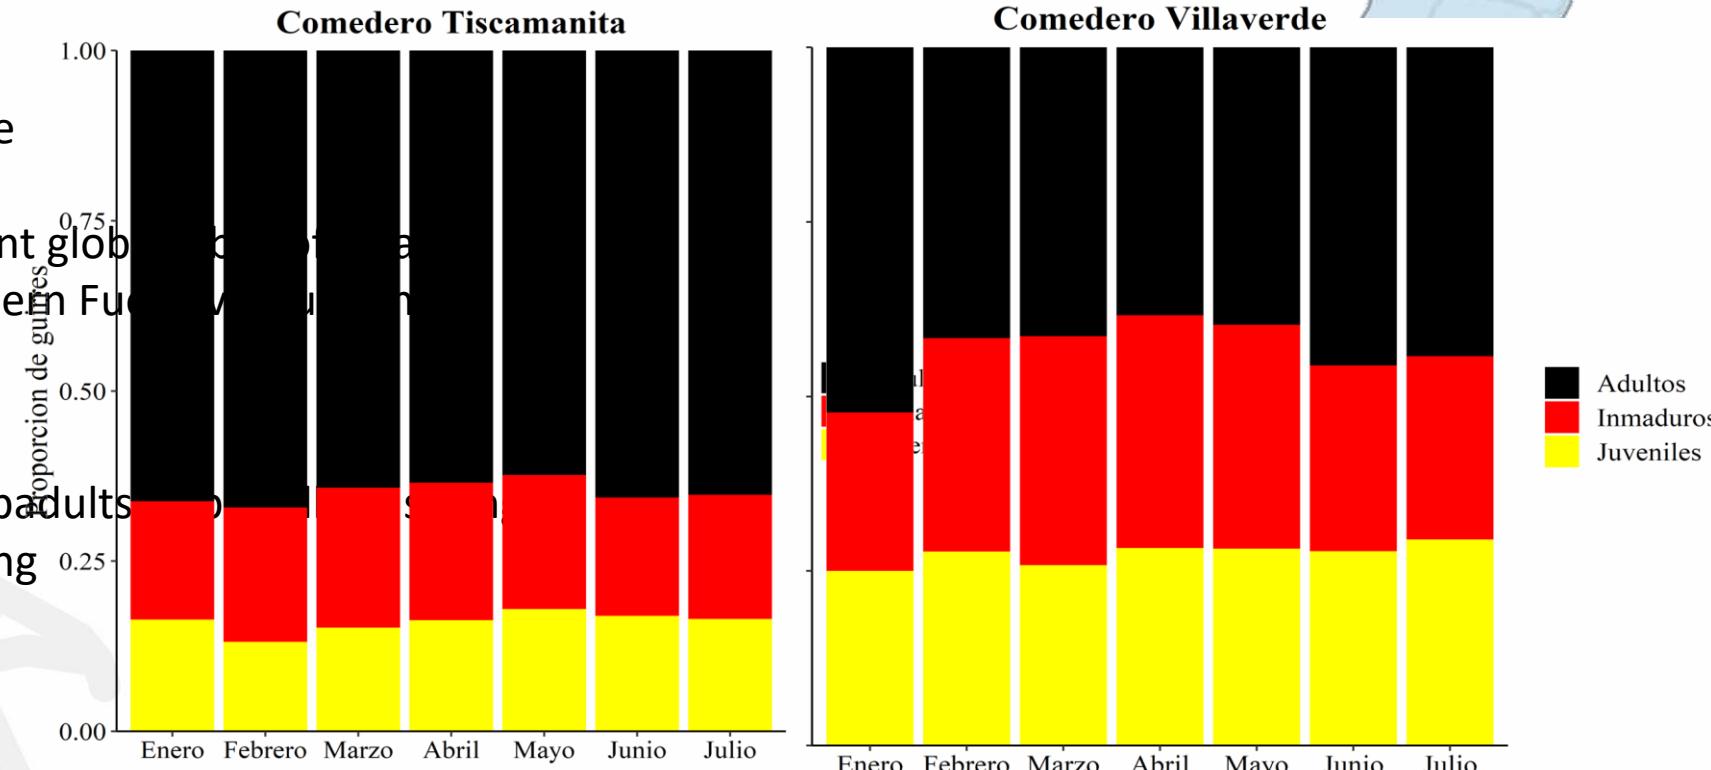

Increase in the number of guirres

Temporal dynamics:
Constant in Villaverde

Relatively unimportant global
importance for northern Fuerteventura
and Lanzarote.

Higher fraction of subadults
- Prospecting

D.1. Seguimiento de la población de guirres (*Neophron percnopterus majorensis*) en las islas de Fuerteventura y Lanzarote.
Estación Biológica de Doñana (CSIC)

Supplementary feeding station Las Breñas

2023

Territorio de LAS MAJADAS (9AT/M, 3T1/M)

EL COHÓN (M/25W, 9PT/M)

ISLOTE DE HALCONES-CALDERA RAJADA
(9AH/M, 0/M)

Supplementary feeding station Las Breñas

Adultos divagantes: 3 ejemplares (9LC/M, 3FT/M, M/3PU)

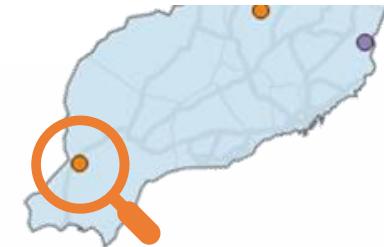

Subadultos e inmaduros: 11 ejemplares

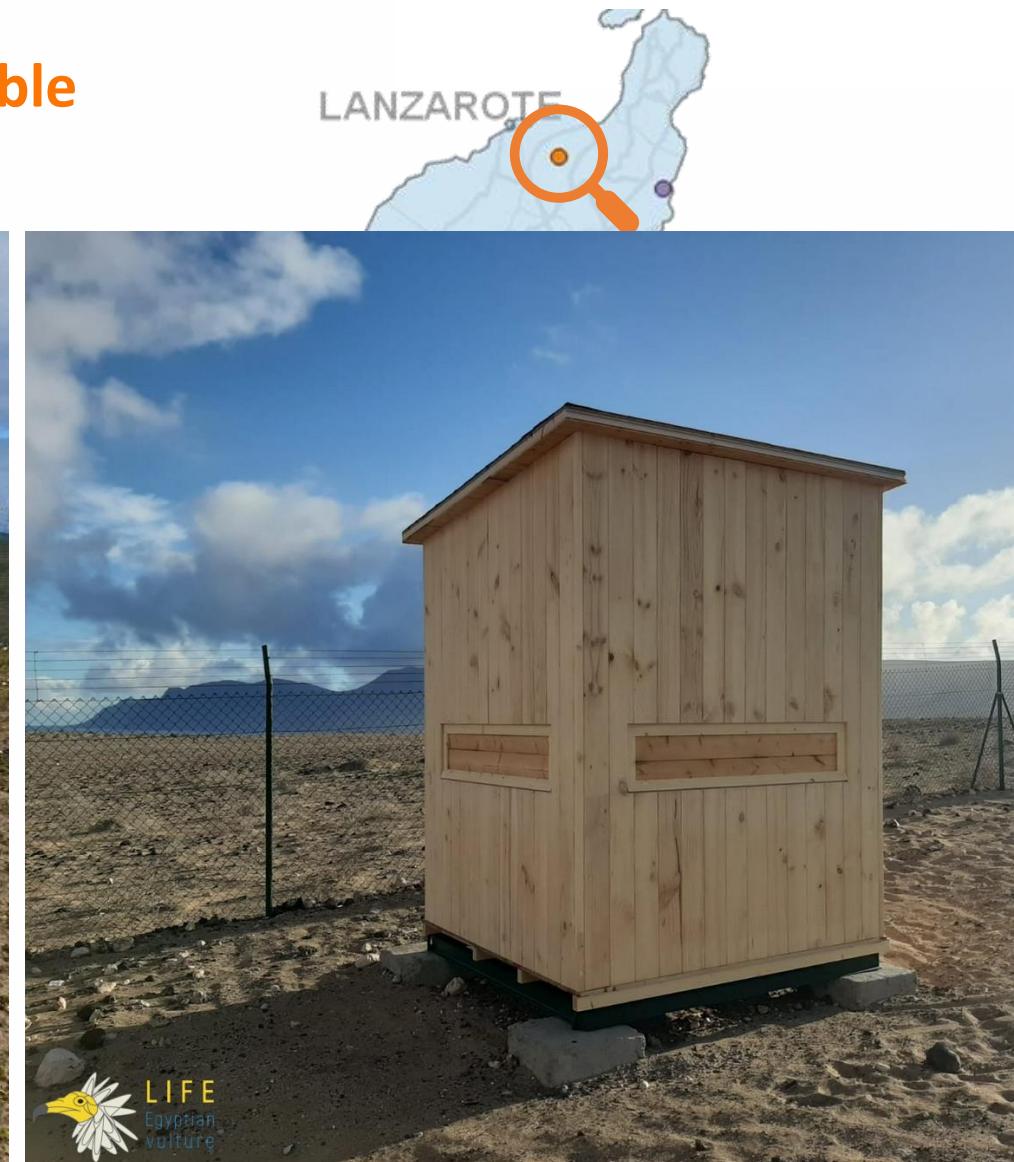

Juveniles del año

Supplementary feeding station Las Breñas

- Bisbita caminero (*Anthus berthelotii*)
- Alcaudón norteño (*Lanius excubitor koenigi*)
- Alcaraván común (*Burhinus oedicnemus distinctus*)
- Cuervo canario (*Corvus corax canariensis*)
- Gaviota patiamarilla (*Larus michahellis naumann*)
- Perdiz moruna (*Alectoris barbara*)
- Halcón de bebería o tagarote (*Falco pelegrinoides*)

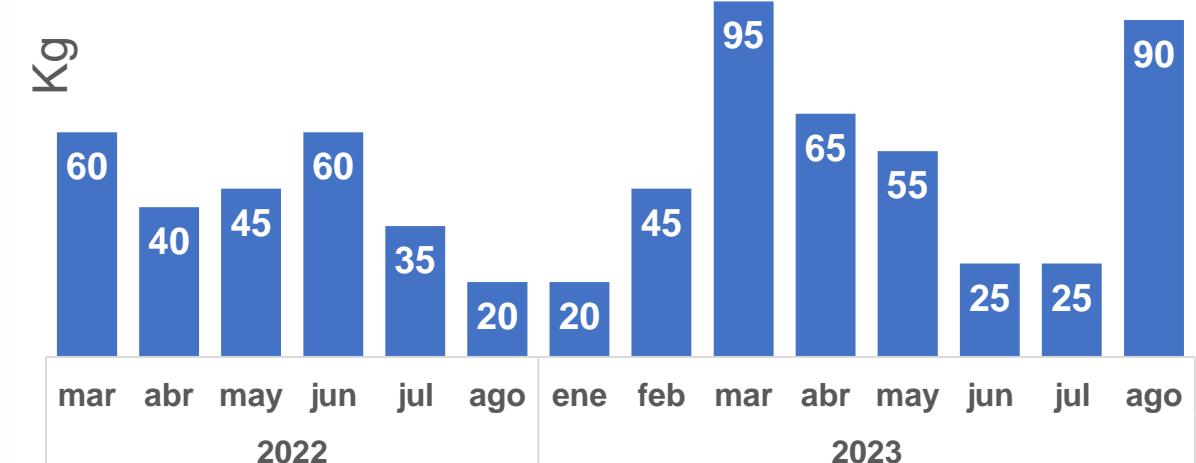

Supplementary feeding station Peña Humar-El Jable

Supplementary feeding station Peña Humar-El Jable

Food support Peña Humar-El Jable

2022

Supplementary feeding station Peña Humar-El Jable

2023

Territorio de MARAMAJO: (M/9WH, A94/M)
Territorio FAMARA (M/282)

Adultos no reproductores en Lanzarote:
4 ejemplares

Subadultos e inmaduros: 2 ejemplares

Supplementary feeding station Peña Humar-El Jable

- Hubara (*Chlamydotis undulata fuertaventurae*)
- Cuervo canario (*Corvus corax canariensis*)
- Alcaraván común (*Burhinus oedicnemus distinctus*)
- Gaviota patiamarilla (*Larus michahellis naumann*)
- Alcaudón norteño (*Lanius excubitor koenigi*)
- Corredor sahariano (*Cursorius cursor*)
- Terrera marismeña (*Alaudala rufescens*)
- Bisbita caminero (*Anthus berthelotii*)

LIFE Egyptian Vulture Project

Final Conference

19-20-21 September 2023

Seguimiento de la población de guirres (*Neophron percnopterus majorensis*) en las islas de Fuerteventura y Lanzarote. Estación Biológica de Doñana (CSIC): José Antonio Donázar, Manuel de la Riva, Julio Roldán, Juan Jesús Moreno, Marina García-Alfonso, Cecilia Gimeno, María Méndez, Pablo Leo.

Equipo Técnico (GESPLAN): Julio Roldán, José Antonio Sarrión, Juan Jesús Moreno, Carmela Lizano, Luz Marina Gutiérrez, Rubén Cerdeña, Carlos-Alexander-Bonk, Álvaro Chocho, Aitor Gil Guruceaga, Olga Pérez

Equipo Técnico (TRAGSA): Pablo Gustems.

**Thank you so much!
Grazie mille!
¡Muchas Gracias!**
